Education and Training

Fall 2026 - **Massachusetts Institute of Technology**

2022 - 2026 **Ladue Horton Watkins High School, Ladue, Missouri, USA** (GPA: 4.0/4.0)

- ACT: 36; PSAT: 1520; 14 AP exams

2025 **Math Research at MIT PRIMES-USA**

- Project: *Geometry of a counting formula for deformations of the braid arrangement* (mentor: Neha Goregaokar and Prof. Olivier Bernardi, Brandeis University)

Summer 2025 **Research Science Institute, MIT**

- Project: *Labeled chip firing on k-ary trees* (mentor: Ryota Inagaki, MIT)

Summer 2024 **Yau Mathcamp, Shanghai, China**

- Courses: *Algebra and Number Theory, Algebraic Combinatorics, Geometry and Topology*
- Best Project Award Bronze Prize: *Smooth approximation of a piecewise constant function* (with Jialai She and Rio Schillmoeller)

Jun 2023 **Mathematical Olympiad Program (MOP), Carnegie Mellon University**

- My performance qualified me for the Team Selection Test (TST) for the USA IMO team.

Research Papers

Remark: Authors are ordered alphabetically on all papers

[1] R. Inagaki and A. Z. Lin, *Labeled chip-firing on undirected k-ary trees*, 2025. arXiv: 2509.17358.

[2] N. Goregaokar and A. Z. Lin, *The geometry of a counting formula for deformations of the braid arrangement*, 2026. arXiv: 2603.24885.

Presentations

Oct 2026 (scheduled)	The 2026 Olympic & Paralympic Performance Innovation Summit, San Francisco
Apr 2026	"Optimal Timing of Power Play in Mixed Doubles Curling", (poster) the Connecticut Sports Analytics Symposium
Oct 2025	"The geometry of a counting formula for deformations of the braid arrangement", the 15th Annual Fall-Term PRIMES Conference, MIT
Aug 2025	"Labeled chip-firing on undirected k-ary trees", the RSI Symposium, MIT

Experience

Math instructor at Expii 2023 - 2026

– Instructor for LIVE (by Po-Shen Loh) (2025 - 2026): Teach advanced math topics and engages students through interactive, live-streamed sessions

– To-Be Teaching Assistant Intern (2023 - 2024): take training and improv lessons

Math instructor at St. Louis Modern Chinese School 2022 - 2026

– Teach a yearlong competition math class (15-20 students) for middle and high school students

– Develop lecture notes, homework, and tests

Selected Honors and Scholarships

2026	Connecticut Sports Analytics Symposium Data Challenge Award (High school / Undergraduate division)
2026	Top 300 scholar, Regeneron Science Talent Search (awarded $2,000)
2025	MIT Research Science Institute (RSI) Scholar
2025	MIT PRIMES-USA Researcher
2025	Silver Medal, USA Physics Olympiad (USAPhO)
2025	Honorable Mention, invitational round of the North American Computational Linguistics Open (NACLO) Competition
2023	Qualifier for the Team Selection Test (TST) for selecting the US IMO team
2023	Qualifier for the US Mathematical Olympiad Program (MOP)
2022-2026	USA Mathematical Olympiad (USAMO/USAJMO) qualifier (5 times)
2024	SIMIS scholarship (equivalent to $9,000 for attending the Yau Mathcamp at Shanghai, China)
2023	Atlas Fellowship finalist (awarded a $1,000 scholarship for students interested in science, philosophy, and the future)

Skills

Computer	C++, Java, Python, LaTeX
Foreign Language	Chinese (bilingual), Spanish (intermediate)
Hobbies	Piano, Chinese Kung Fu, chess (USCF class A), violin, tennis, soccer
